MINIES WININGSTOCKS

BULLFROG MINES AS REPRESENTED

So Reports an Old Park City Operator After Investigation.

EXAMINED PROPERTIES IN THE FARMINGTON DISTRICT.

WEEK'S ORE AND BULLION

James Farrell, the old-time Parkite and mining operator who has been on his maided trip into the Bullfrog country to look over the possessions of the Bullfrog-Kawich company, in which he is largely interested with W. V. Rice, W. W. Armstrong, J. H. Shockley, W. H. Clark and others, returns a confirmed convert and an enthusi-astic exponent of the country's merits. Those who know him best will attach the greatest weight to what he says, for they know that it takes more than the explosion of a fire-cracker to carry him off his foot.

him off his feet.

"When I got as far as Goldfield," said
Mr. Farrell yesterday, "I told the boys
I was willing to trust to their judgment
and that I would return. I did not partlcularly relish the trip and, as I had
previously reached the conclusion that
much of what had been said regarding
the country was largely made up of much of what had been said regarding the country was largely made up of 'hot air' and enthusiasm, I could not see that it would do any good for me to go in and throw cold water on propositions that my associates thought were all right. But it was all to no purpose, Messrs. Shockley and Clark insisted that I make the trip and the former declared that he would show me more gold than I had over seen in

former declared that he would show me more gold than I had ever seen in a new camp in my life.

"Well, all I can say is that he did it. I have seen the mines or prospects which the papers have been talking so much about lately and I am ready to add my endorsement to everything that has been said. It is one camp in which the conditions have not been exaggerated. It contains monster ledges and the ledges carry the values. When you come to cross-cut veins for more you come to cross-cut veins for more than 100 feet and find pay ore all the way I want to say that you have struck something worth while, something that none but the experienced can begin to

appreciate.

"I saw nearly all of the properties that are being developed and I did not find a single one that had been boosted beyond its merits. The Shoshone, the National Bank, the Denver and the Tramp, each and every one of them, are mines. There is no question about it. We have a property containing nearly 100 acres adjoining the Tramp. Five ledges run through it and the tunnel being driven will reach the first one very soon. We have no fear of results.

results.

"Henry Peery and his combination have a big thing. There is no doubt of that, either. I don't mean as a stock-selling proposition. They are on the great Shoshone lode and a few hundred feet only from where the latter is mining in a body of ore that is practically 100 feet thick. The Peery or Montgomery Mountain property contains that ore body, just as sure as fate, and during the next few weeks they will have it opened in one if not both of the tunnels being driven to tap it.

wherever any amount of work is being done and I feel just as certain as I can do that Bullfrog is going to be the home of several of the greatest producing mines that Nevada, with all its glorious mining history, ever knew."

LANDS THE IRISH MOUNTAIN.

Salt Lake Talent, Headed by W. J. Lawrence, Takes Nine Claims.

A short time ago Will J. Lawrence A short time ago will J. Lawrence secured a short-time option upon a group of six claims in the Irish Mountain district, Lincoln county, Nevada, and at the same time he located three claims adjoining. He then returned to this city and told a few of his friends what he had secured, and he was not long in securing the co-operation of

what he had secured, and he was not long in securing the co-operation of enough of them to clinch the deal and, with the checks in his pocket to discharge his obligations under the bond, he left for camp again last night.

"Don't ask me to go into particulars at this time," said Mr. Lawrence yesterday afternoon. "I am perfectly satisfied that we have a big thing, but until after the ground recently located has been fully and formally made secure through the doing of the location work and recording. I am not in a position to and recording, I am not in a position to do any talking. I have watched and waited for a good while to land just is plenty of time to let the public know

SMELTER MAN'S VISIT.

Highland Boy's Constructing Engi neer Spends Couple Days in Town.

R. T. White, the engineer unde R. T. White, the engineer under whose direction the Highland Boy smelter was built on plans and designs supplied by Frank Klepetko, left for New York yesterday afternoon after having spent a couple of days in meeting and greeting old friends here.

"Bob" White, as his intimates insist statement of the properties of the properties of the properties of the properties of the properties.

"Bob" White, as his intimates insist on calling him, gave up his position at the smelter and left here in the spring of 1902. He went east and has since been employed on the staff of Mr. Klepetko. Just recently he has been taking a run through the British Columbia mining and smelting regions. He came down by way of Butte, and has been having an enjoyable time since he reached here. reached here.
Mr. White was succeeded at the

Highland Boy smelter by W. C. Thom as, who is now on the metallurgica staff of Samuel Newhouse, but their greeting was none the less cordial be-cause the one relieved the other. They were jolly good friends before; there is

ALL'S NOT GOLD THAT GLITTERS

Missouri and Kansas Men to Number

of 100 Badly Fooled.

Con. Merci Andes ...

Cheyenne, Wyo., May 27.—Through the misrepresentations of a resident miner in the Hecla district, twenty-five miles west of Cheyenne, twenty or thilty poor persons who were induced to come from Missouri and Kansas in the hope of making their fortunes, are now destitute. Captain Crook, a squatter, is said to be responsible for the pitiable condition of the new comers; that he wrote to a relative in Missouri the misrepresentations of a resident miner in the Hecla district, twenty-five miles west of Cheyenne, twenty or the hope of making their fortunes, are now destitute. Captain Crook, a squatter, is said to be responsible for the pitiable condition of the new conpers: that he wrote to a relative in Missouri and the pitiable condition of the new content of persons could become rich in a few days by simply picking out plees of rock that were almost solid gold. The relative got the gold fever and came west, bringing relatives and friends for miles around.

When they reached Hecla they found that Crook's golconda was nothing more than a tensfoot prospect hole without even a trace of mineral. Some with hoisting costs, will mean a great saving in expense. We are still developing the 'Brooklyn and we have here a very large tonnage of the average ore of the Bingham camp. In the Commercial we have developed at the present time 500,000 tons of ore, and Mr. McVichie estimates within a few months we will put into sight nother 500,000 tons. We figure that we have ore reserves in sight today to last for the total being \$83,500, as follows: Silver, lead, gold and copper ores, \$25,400; as bullion, \$38,500; gold bars, \$20,000.

The open market during the past week, as months we will put into sight today to last for the total being \$83,500, as follows: Silver, lead, gold and copper ores, \$25,400; as bullion, \$38,500; gold bars, \$20,000.

The open market settlements and the production of the individual copper month.

"In the Eagle & Blue Bell we are town \$50 feet, and the shaft will be sunk fifty feet more. Then we shail this with the seather of the firm of Freeland & Co. conducting the bringhing relatives and the production of the individual copper month.

"In the Eagle & Blue Bell we are town \$50 feet, and the shaft will be sunk fifty feet more. Then we shail this have each been greater than during the previous week though, in the production, which is 14,000 tons persons have each been greater than during the previous week though,

mines and the others are being provided with food and shelter by kindly disposed ranchmen and prospectors.

MINING STOCK EXCHANGE.

Week of Spiritless Trading With

Prices at Mercy of Bears. ther dull, spiritless week was to a close on the mining exeyesterday. Sales for the six days sted to 121,216 shares of stock, the value of which was \$25,379.89, or more than during the week preMay Day and New York were the tocks to attract more than passing ion, the former declining 1½c durie week, while the latter rose from 55c and closed at 57c.

MINES NORTH OF TOWN.

Officials of Kentucky Co. and Ex-

perts Go Over Farmington District. Manager John Bogan of the Rheinney Mining company's property at Farmington, a few miles north of this city, was in town yesterday for a few hours. While there is nothing particularly new to report from his company's ground, where nothing is being done outside of driving the party made he outside of driving the new tunnel, he says the district is attracting atten-

The Kentucky company, which owns a group of claims southwest of the Rhemney, in Steed canyon, has just been visited by a number of the big guns in the organization, accompanied by a Denver mining expert. The party pulled out two or three days ago and Mr. Bogan says he is confident they leave with a good opinion of the district and the prospects for the future. "If their expert reported to them in the same spirit that he talked to me," said Mr. Bogan, "his clients must feel that they are spending their money in a good country and with most favorable chances of success. He was shown able chances of success. He was shown every courtesy at the Rhemney, and at the conclusion of his visit expressed the opinion that some big mines would be found buried in the mountains east of Farmington. There may be some-thing more to report as a result of the visit of these people, but nothing has happened to talk about as yet."

FROM THE ANNIE LAURIE.

Ore Is Now Going to Mill From No. 5 Tunnel.

Manager S. M. Levy of the Annie Laurie came up from Gold Mountain Friday night to look after business requiring his attention on this end of the line. He states that all track connections between the mill and the mouth of No. 5 tunnel were completed yesterday, and that ore from the mine's deepest workings is now going to the plant for treatment.

The exploration of the vein on the The exploration of the vein on the lower tunnel level is now being actively prosecuted, and as values down there have been bordering on the sensational, the product is expected to make the mill average of all the rock treated run much higher than formerly.

At the new power plant, on the Sevier river, Mr. Levy says, good headway is being made, and, barring delays in securing material, he will have it in commission by Aug. 1.

mmission by Aug. 1.

MORE BINGHAM COPPER.

Mineral-Bearing Lode.

The mineralized perphyry has been opened up in still another property, the Copper Glance, adjoining the Starless on the east, says the Bingham Bulleon the east, says the Bingham Bulle-tin. This company has been driving a tunnel to cut the veins that it opened up by shafts on the opposite side of the hill and has gone through 750 feet of quartzite. A few days ago a small fis-sure was crossed and immediately the character of the rock changed. Now the whole face of the tunnel is in a blue porphyry, strongly migralized, and it. porphyry, strongly mineralized, and it appears to be identical with the rock taken from the Utah Copper and Starless. No assays have yet been made, but Superintendent Sawyer reports that the porphyry is becoming more strongly mineralized with every foot of development.

of development.

Of course it is not known how far the porphyry extends, but its occurrence in neighboring properties justifies the belief that the main body cuts across Copper Glance ground. The company is in position to open it up very advantageously as by going down

company is in position to open it up very advantageously, as by going down the gulch and starting another tunnel great depth can be gained.

It has been the expectation that the first of the veins for which the tunnel has been driving would be struck within a few feet more, but with the rich porphyry in its possession the management will lose all interest in veins.

The tunnel is a fine piece of work, being six by seven feet and as straight

BINGHAM CON. CONDITIONS.

On Reaching Boston, President of Company Unbosoms Himself.

President E. L. White of the Bingham Consolidated has reached Boston, and in an interview touching his visit the company's properties here he

"Perhaps the most important work which is now taking place underground is that on the Lark vein, in the Mascot tunnel. We are driving east and west on this vein and have exposed ore on the 1,400-foot level. Our copper values have the first taking the control of th ues have run from 4 per cent to 17 per cent; silver from ten to thirty ounces, and lead from 20 to 50 per cent. The best ore is that encountered in the

deepest workings.

"The Miner's Dream property has been drained, and we shall very soon begin driving from the Mascot tunnel under the Miner's Dream. The tunnel will tap the property 600 feet lower than the lowest workings attained. the lowest workings attained when we were formerly working the property.

"All the ore from the Dalton & Lark properties will hereafter be handled through the tunnel, which, in comparison with hoisting costs, will mean a great saving in expense. We are still

sider this the most important develop-ment which has taken place since we took over the Eagle & Blue Bell prop-erty. This mine is now shipping be-tween forty and fifty tons per day, and by July 1 the shipments will be ma-

terially increased.
"The smelter is working splendidly in all departments, and such improvements and changes as constantly occur in any manufacturing proposition and which increase efficiency and reduce cost, are being made."

Metal Markets.

Silver, 58%c per ounce. Copper (casting), 14%c per pound. Lead, in ore, \$5.50; New York, \$4.50 per 90 pounds.

Bingham Mining Notes.

of the tunnel understood sion of the tunnel on that property.

It is understood to be the intention of the Rio Grande Western to double tract the Cooper Belt road as far up as it Utah Cooper, and at the same time number of the curves will be straigh ened. This will involve some heavy work that it is rendered invested to the cooper will be straight that it is rendered invested.

Mining Notes.

J. M. Lockhart came down from the Park on mining business Friday night. Manager W. F. Snyder went out to Stockton yesterday to size up condition at the Honerine.

L. F. Peer and George Crismon re-turned from a trip to the Irish Mountain district, out of Hjko, Nev., yesterday morning.

The May Day company reported in the market during the week with five cars of ore, the last two of which landed at the sampler yesterday. The Pioneer sampler was yesterday in eccipt of two cars of ore from iBngham, wo from Tintic, one from Alta and one from Fish Springs.

Fred C. Richmond returned from Evan-ton yesterday morning, after having old a 150-horse power boiler to the elec-ric company of that town. Seven cars of ore from Nevada. six from Tintic, two from Bingham and one from Idaho were reported at the Taylor & Brunton sampler yesterday morning.

Chief Engineer A. J. Bettles of the Newhouse metallurgical staff returned from a trip to the big milling plant at the Cactus yesterday morning. He says everything is working nicely and a fine grade of concentrates is being turned out. Secretary L. A. Amsden of the Yankee Consolidated returned from his six weeks' trip to the coast Friday night. He reports having had a fine time and the complete loss of a pair of heavy mine shoes through wear during his tramps. He returns greatly improved in health.

Man's Unreasonableness

Mrs. Winslow's Soothing Syrup is the prescription of one of the best female physicians and nurses in the Urited States, and has been used for sixty years with never-failing success by millions of mothers for their children. During the process of teething its value is incalculable. It relieves the child from pain, cures diarrhoea, griping in the bowels and wind collc. By giving health to the child it rests the mother. Price, 75 cents a bottle. Herald Want Ads Bring Results.

After taking Electric Bitters she was perfectly cured, and can now perform all her household duties." Guaranteed by Z. C. M. I. Drug Dept. Price, 50c.
